You probablu h	have a fridge in your house	to keep your food cool, but have you ever			

You probably have a fridge in your house to keep your food cool, but have you ever thought about what people did in the past? People have used ice to keep food cool for thousands of years. In the north of Europe in winter, people were able to use snow or ice, which they kept underground for many months. In 1842, an American doctor called John Gorrie invented a machine to make ice. He used it to keep people cool when they got an illness called yellow fever. By 1900, places that sold meat in the USA started to have fridges and today, nearly all homes in the USA have a fridge in their kitchens.

We continue to use the same technology for fridges that we have used for a century. The problem is that a room with a fridge in it is a lot noisier and hotter than other rooms! Now people are designing modern fridges that are neither hot nor noisy. These are going to use less energy, too, so they will be more efficient.

Dolphins have been a popular attraction in <u>recent</u> years. They are more interesting than tigers and lions because they are more active and perform tricks, like circus animals. Although they want to do as the trainer wants, they get bored when they are asked to do the same trick twice. This is one reason that makes scientists believe that they are intelligent. Dolphins are believed that they are the nicest creatures in the sea.

There are stories about dolphins that helped sailors who were going to drown in the sea. In Africa, there are two dolphins that are trained to help sailors swim and frighten sharks away. Some people like to watch dolphins. Children also love seeing dolphins as they like their fast actions and funny way of playing, jumping or running. They are very nice creatures and good animals.

Population means the total number of people living in a particular area. The world population right now stands at more than 7.8 billion. China and India are more than 35% of this population. China has the most populated country and India is taking the second position.

It was expected that the world population would reach one billion for the first time in 1804. It was 1927 before it reached two billion, but it took only 33 years to reach three billion in 1960. Now it only takes 12 to 13 years to add one billion people to the world.

Trees are the best gift of nature for us. They make the environment beautiful and clean. Water and sunlight are very important to help trees grow.

Trees can be called the best friend to mankind. People get food from trees. Many animals get their food from leaves, vegetables and fruits grown on trees. They also live near the shadow of trees. We should stop cutting down trees to save nature. They take in sunlight, carbon dioxide and water to produce oxygen which helps to support all forms of life on earth.

Wood from trees is used to make paper, furniture and other goods of daily use. As a result, a large number of trees are cut down every day to cover these needs.

Trees also give us wood and shade. Houses, chairs and toys are made from wood we get from trees. Different kinds of trees provide us with materials for food, clothing and medicines.

The camel is called the ship of the desert because it has the ability to stay alive in the desert without food and water for six to ten days. Camels are able to stand the loss of about one third of their body liquid without feeling tired. Their noses, ears and eyes are formed in such a way that they are least affected by the dust of the desert. It is a very useful animal for desert travellers and they can carry enormous loads. It is commonly believed that a camel does not need food very regularly, but this is not correct. Because of its amazing body, it can store food and water for many days.

The camel has a big hump on its back. As a matter of fact, this hump is a store house of fats. The camel uses the fat as a source of energy during its long journeys in the desert. When <u>it</u> does not get water, it uses the stored water in its body.

Elephants are the largest land animals. Whales are the largest sea animals.

The shape of an elephant's head is similar to that of a whale. Elephants are excellent swimmers. Like whales, elephants use sounds to show anger or for communication. Female elephants behave like female whales.

Elephants' trunk is not just a large nose or upper lip. It is very important. It can do many very important jobs. The trunk is also used as if it is a kind of hand. At the end of the trunk, there are two muscles shaped like fingers. These muscles can pick up food and water and carry them to the elephant's mouth. 3 Read the following text, then answer the questions:

Children are very dear to us. We all work hard and do our best to make them feel happy. So we must bring them up well to be good people. Bringing up children is a very hard task. There are three stages in bringing up children. The first stage is that just after birth. This stage needs good food and good cleanliness. The second stage is that of early childhood. It is very important and hard at the same time. This second stage needs playing games and making children learn new ways of life. The third stage is that of teenage. This third stage is very dangerous and critical as <u>it</u> needs to be accurate in dealing with children at that time. Any mistake made in any stage means a battle lost in the future.

When children are well brought up, they will be good people that are useful to society. On the other hand, if children were neglected, many problems will appear in society later on. So we must be very careful when we bring our children up.

Trees are the best gift of nature for us. They make the environment beautiful and clean. Water and sunlight are very important to help trees grow.

Trees can be called the best friend to mankind. People get food from trees. Many animals get their food from leaves, vegetables and fruits grown on trees. They also live near the shadow of trees. We should stop cutting down trees to save nature. They take in sunlight, carbon dioxide and water to produce oxygen which helps to support all forms of life on earth.

Wood from trees is used to make paper, furniture and other goods of daily use. As a result, a large number of trees are cut down every day to cover these needs.

Trees also give us wood and shade. Houses, chairs and toys are made from wood we get from trees. Different kinds of trees provide us with materials for food, clothing and medicines.

The gardens have lots to see. We will make sure that we wear shoes! We can see a lot flowers and plants from all over the country. There is also a small 4 and a museum.

Read the following text, then answer the questions:

Dolphins have been a popular attraction at zoos in <u>recent</u> years. They are more interesting than tigers and lions because they are more active and perform tricks, like circus animals. Although they want to do as the trainer wants, they get bored when they are asked to do the same trick twice. This is one reason that makes scientists believe that they are intelligent. Dolphins are believed that they are the nicest creatures in the sea.

There are stories about dolphins that helped sailors who were going to drown in the

sea. In Africa, there are two dolphins that are trained to help sailors swim and frighten sharks away. Some people like to watch dolphins. They enjoy watching their tricks, actions and movements. Really dolphins are very interesting and funny animals.

Children also love seeing dolphins as they like their fast actions and funny way of playing, jumping or running. They are very nice creatures and good animals.

Children are very dear to us. We all work hard and do our best to make them feel happy. So we must bring them up well to be good people. Bringing up children is a very hard task. There are three stages in bringing up children. The first stage is that just after birth. This stage needs good food and good cleanliness. The second stage is that of early childhood. It is very important and hard at the same time. This second stage needs playing games and making children learn new ways of life. The third stage is that of teenage. This third stage is very dangerous and critical as it needs to be accurate in dealing with children at that time. Any mistake made in any stage means a battle lost in the future.
